Barcelona, Spain · Open to relocation to Switzerland · EU citizen, no visa sponsorship needed

PROFILE

Fullstack engineer building **AI agents**, **.NET and Python APIs** and **cross-platform mobile apps** in production. At Plain Concepts I deliver RAG-based agents on Google Cloud Vertex AI, integrated into Microsoft Teams through Azure, working autonomously and directly with the client. I have already lived and worked in Lucerne and I am looking to relocate to Switzerland.

EXPERIENCE

Software Engineer — Fullstack & AI

2025 — Present

Plain Concepts · Client: Puig · Barcelona, Spain

- Built **AI agents with Google ADK on Vertex AI**, using **RAG** over Vertex AI data stores to ground answers in company documents.
- Designed the **document ingestion workflow**: JSON metadata, data store imports and content updates so the agents always answer from current knowledge.
- Developed the **FastAPI** (Python) backend connecting the agents with the rest of the platform.
- Integrated the agents into **Microsoft Teams** via **Azure Bot Service**, in a multi-cloud architecture (Google Cloud + Azure).
- Built **Azure DevOps CI/CD pipelines** to deploy across four repositories: agents, bot, API and infrastructure.
- Designed **.NET REST APIs** (CQRS, Clean Architecture, EF Core, PostgreSQL) and **React Native** apps for iOS and Android, with Firebase release tooling (App Distribution, Crashlytics, Analytics).

Google ADK · Vertex AI · Python · FastAPI · Azure Bot Service · Azure DevOps · .NET · React Native · TypeScript · PostgreSQL · Firebase

Backend Developer (.NET) — Internship

Oct 2024 — Mar 2025

Quantion · Barcelona, Spain

- Shipped **.NET (C#)** features and tested REST endpoints in a live production codebase from day one, and refactored legacy code within a Scrum team.

Camp Counselor

Jul — Aug 2024

SJAS Summer Camp · Lucerne, Switzerland

- Led international groups in outdoor and team activities, working daily across languages and cultures.

Earlier roles

Sales Representative & Web Developer, **CamperXpress** (2022) · Hardware Technician, **Pista Cero Informática** (2021 — 2022)

SELECTED PROJECTS

GenAI Data Platform

Corporate GenAI mentorship program

- Natural-language analytics: an LLM turns business questions into SQL, a governed semantic layer validates every query (read-only, row-level security), and results are published automatically as Metabase dashboards via its REST API. Built the semantic definitions, the Metabase integration and the Streamlit interface.

LLM · SQL · PostgreSQL · Metabase API · Streamlit · Python

Fit

Personal training app I use daily · fit.alanteixido.dev

- AI coach built on the Claude API with tool use over my own data (meals, workouts, daily metrics, goals), plus Strava and Google Health Connect integrations.

Next.js · React · TypeScript · Supabase · Vercel · Claude API

ProTactics

Football club management platform · github.com/AlanTeixido/ProTactics

- Fullstack platform with role-based auth, training planner, player tracking and an interactive tactics board.

Vue 3 · Node.js · REST API · PostgreSQL

SKILLS

AI & Agents	Google ADK, Vertex AI, RAG, Vertex AI Data Stores, Azure Bot Service, LLM APIs (Claude)
Backend	.NET (C#), ASP.NET Core, Python, FastAPI, Node.js, REST APIs, CQRS, Clean Architecture
Frontend & Mobile	React, Next.js, Vue.js, TypeScript, Tailwind CSS, React Native, Expo, Firebase
Cloud & DevOps	Azure DevOps CI/CD, Google Cloud, Azure, Docker, Git, App Insights
Data	PostgreSQL, Entity Framework Core, SQL, Supabase
Languages	Catalan (native), Spanish (native), English (native), French (basic)

EDUCATION

Higher VET Diploma in Web Application Development (CFGS DAW) · Institut Tecnològic de Barcelona

2025

Intermediate VET Diploma in Microcomputer Systems & Networks (CFGM SMX) · IFP Hospitalet

2021 — 2023
